Altered Security

Bijay Upreti

An analytical, critical-thinking,
customer-focused security engineer
familiar with internal network
pen-testing and learning the roots
of web application and API testing.
Familiar with industry grades tools as
well as open source tools in order
to perform security assessments along
with phishing campaigns, adversary
simulation, internal network testing, and
vulnerability assessments. Efficient at
working independently or as part of a
supportive team.

Employment History

Offensive Security Consultant Jan 2022 - Present
Stickman Cyber Pty Ltd · Sydney

- Performed internal and external network penetration tests for multiple clients and provided them with remediation measures.
- Performing penetration testing on Azure Active Directory.
- Scheduled vulnerability assessments for multiple clients on a monthly basis and updated them with the report required.
- Led server client meetings in order to provide them updates regarding the penetration test and provided them with the details of the vulnerabilities identified.
- Performed phishing campaigns for multiple clients with more than 50% success rate.
- Documented everything and created the industry standard final report for the conducted penetration tests.

IT Support Analyst Sep 2021 - Dec 2022
Containers Exchange Services · Sydney

- Providing first-line support for clients and staff through phone, email, and remote control service.
- Leveraged ticket tracking system to prioritize, track and document problem resolutions and notified end-users of issue status.

Hobbies

Attending Info-Sec Meetups

Sectalks, Bsides, CrikeyCon

Setting up home labs

ProxMox, Virtual Servers, Active Directory

Watching Sports and Playgin Games

Soccer, NBA, NFL, FIFA

- Leveraged Power BI and oracle analytics to perform detailed searches for client support.
- Profiled Desktops and laptops to make it user ready such as Outlook, Teams, One Drive, and SharePoint configuration.

Goals

Learn programming in order to build and customize tools.

Focus more on red teams and EDR bypass.

Passing certifications like OSCP and OSWE.
